

Quote for Annual Subscription for 53 Weeks of SAFETY

Grounded in years of workforce development and training for manufacturing, Polytron's 53 Weeks of SAFETY provides an effective training product to support your plant's facilitators by educating and empowering them to exhibit safety and health expertise, and use sound instructional skills to advocate for safer working conditions.

53 Weeks of SAFETY delivers easy to use 5-minute Daily Safety Discussions. These Line Lead tools are designed to be used for a shift-change safety meeting. The product provides the Leads with a consistent tool to hold safety discussions at the start of each shift, or a 15-30 start-to-finish safety meeting once a week (depending on topic and facilitator).

13 Series – 4-5 Topics per series – 53 weeks of topics total.

Each downloadable topic packet includes:

- One (1) front/back Information Handout that includes a case study and activity
- One (1) page Lead Notes – talking points (topic guide notes)
- One (1) 8.5X11 Reference/Reminder Poster for the day (or week, depending on the series topics)
