

How 58% of Plants Are Improving Quality Management

Companies around the globe are leveraging Next-Generation MOM software to ensure compliance, mitigate risk, and create consistent quality – from supply chain to end user.

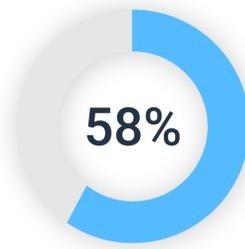

Sixty-six percent of companies identify **consistent quality** as a top strategic objective.

Creating Value by Closing the Loop

Next-Gen MOM software closes the loop on the shop floor by minimizing inspection dependencies and controlling quality across the value chain.

Fifty-eight percent of companies use **MOM Software** to effectively manage their productions.

Eliminate the Disconnect to Minimize Loss

Enhance quality and minimize loss by following these steps:

Analyze critical control points and potential hazards in real-time

Evaluate KPIs and production events to confirm regulatory compliance

Communicate any non-conformance concerns with alerts and notifications

Engage stakeholders consistently in audits and continuous improvement

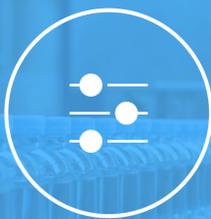

Advancing Continuous Improvement

Next-Gen MOM software will be the leading solution for advancing continuous improvement throughout the value chain, from product ideation through distribution and service.

Improved Visibility

- Real-Time Quality Data
- Electronic Records
- Alerts & Notifications

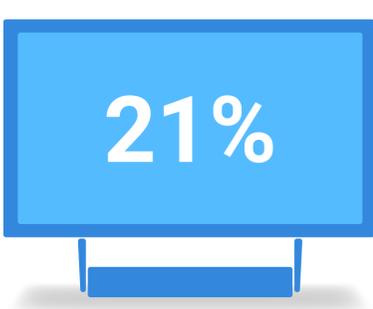

Increased Control

- Reports & Analytics
- Manage Batch & Recipe
- Materials Tracking

Bottom-Line Results

- On-Time Delivery
- Shorter Lead Time
- Lower Consumption Cost

Proven Quality Results in Manufacturing Operations

Twenty-one percent of manufacturing plants have already implemented software to enhance operations, and 40% have realized the competitive advantage of integration and are moving forward with MOM software.

Improve Quality with TrakSYS

TrakSYS is a Manufacturing Operations Management software platform with built-in features for virtually every aspect of production, including quality management. TrakSYS makes it possible to bring about and enforce a quality-by-design culture that is both effective and sustainable. With TrakSYS, you can manage all essential elements of quality such as SOPs, tasks, accountability, traceability, notifications, audit trail, reports, scheduling, and analysis. Learn more about how TrakSYS at www.parsec-corp.com.

Parsec is the developer of TrakSYS™, a proven operations management software application and solution platform designed to significantly improve manufacturing processes. Parsec is committed to providing best-in-class products and solutions to our worldwide community of clients to assist them in optimizing their manufacturing operations. There are thousands of TrakSYS™ licenses in use around the globe in a wide variety of industries. TrakSYS™ helps manufacturers to maximize asset utilization and efficiency, increase capacity with no new capital equipment, reduce production costs, decrease lead time, and improve profitability. For more information about Parsec and TrakSYS™, please visit the corporate website at www.parsec-corp.com.
