

SMART MANUFACTURING Maturity Index

SMART MANUFACTURING (SM) MATURITY INDEX People – Process - Technology

People Maturity Scale												
LAGGARD		INDUSTRY AVERAGE					BEST-IN-CLASS			FUTURE		
High Staff Turnover	Disengaged Workforce	Lots of Manual Work	Lack of Technical Skills	Lack of Passion for SM	Lack of Leadership Support for SM	Problem Solvers	Awareness of SM	Continuous Improve- ment Mindset	Stakeholder Alignment "all on the bus"	Learning from SM Pilots	Involved with SM Rollouts	Supporting Full Conver- gence

© 2019 Polytron, Inc.

Identify where on the scale mostly represents the current state of the **People** part of your Digital Journey.

The steps to the right of your current state provide a visual of the components that should be considered for your Road Map. Individual Road Maps will vary.

SMART MANUFACTURING (SM) MATURITY INDEX People – Process - Technology

	Process Maturity Scale												
LAGGARD			INDUSTRY AVERAGE					BEST-IN-CLASS			FUTURE		
Lots of Process Variability	Depend heavily on Tribal Knowledge	Few Docu- mented Processes	Processes Docu- mented on Paper	Searching For Best Practices	Electronic Docu- mentation of Processes	Processes are Followed & Feedback Provided	Established Best Practice Workflows	Continuous Improve- ment for Processes	Fully integrated Digital Workflows	SM Pilots Improve Process Efficiency	SM Rollouts Drama- tically Change Processes	Full Conver- gence of Processes

Identify where on the scale mostly represents the current state of the **Process** part of your Digital Journey.

The steps to the right of your current state provide a visual of the components that should be considered for your Road Map. Individual Road Maps will vary.

SMART MANUFACTURING (SM) MATURITY INDEX People – Process - Technology

Technology Maturity Scale												
LAGGARD			INDUSTRY AVERAGE					BES	ST-IN-CL	FUTURE		
Little to no Automation	No network or Connec- tivity "Islands of Information	Technology Is Feared	Techno- logies	Mis- application of Technology	Infrastruc- ture in place (network; servers, thin clients)	Mostly Digital (little to no paper on plant floor)	Technology Stack Being Developed	Level 3 (MES / MOM) – Initial Implemen- tation	Level 3 (MES / MOM) – Robust Implemen- tation	SM Pilots for Advanced Techno- logies	Multiple SM Rollouts	Full Conver- gence of SM Techno- logies
