

FOR IMMEDIATE RELEASE

Polytron joins the Banner Engineering Wireless Integrator program to Deliver Turnkey Predictive Maintenance Solutions

DULUTH, GA – August 12, 2020 - Polytron, Inc., an award-winning consulting and engineering firm servicing manufacturers in North America for over 35 years, is pleased to join Banner Engineering's Wireless Integrator program. Banner Engineering, a global leader in the field of Industrial Automation, manufacturers sensors and wireless products that allow for **faster and more cost-effective deployments of Predictive Maintenance, OEE and other solutions** compared to traditional wired solutions. Both companies share a history of innovation and decades of servicing manufacturing customers of all sizes.

"We are excited about our partnership with Banner and the opportunity to better serve our customers looking to deploy cost-effective Predictive Maintenance solutions", stated Richard Phillips, Polytron's Director of Smart Manufacturing. "Many manufacturers are looking for ways to better manage asset health to prevent costly downtime and repairs. Leveraging Banner's wireless products and Polytron's expertise in delivering Smart Manufacturing turnkey solutions allows us to deliver even greater value to our clients."

"Machine health monitoring and Productivity solutions have been proven to provide a high rate of return for customers. The challenge often is the proper installation and commissioning of such systems." Polytron is a symbiotic partner in integrating the Banner wireless solutions based upon each customer's individual needs and expectations. "We are happy to welcome Polytron on as an Authorized Integrator for Banner Industrial Wireless", said Todd Hanson, Banner's Director of Industrial Wireless.

Polytron is currently working with multiple manufacturers helping architect and deploy these solutions.

#####
